mid to large-scale projects. Experienced in public-facing applications.

WORK EXPERIENCE

02/2020 - Present **Front end Developer React & React Native**

Digieggs Ltd, UK/London & Turkey/Izmir
www.digieggs.com

React Native Developer

Triwi Mobile Health App (Lead Developer Mobile Developer): Triwi is a healthcare app built with React Native that utilizes Internet of Things (IoT) technology through a wearable device. It allows users to self-perform breast exams and view the data collected by the wearable device on a data grid within the app. GraphQL is used for requests and most of the app's components were built from scratch without the use of third-party libraries. These custom components include pickers, date pickers, onboarding screens and animations, app-wide notifications, and toast messages. Users can also record any unusual findings and log their examination history. The app includes a reminder function based on the user's menstrual cycle to assist in managing breast health and detecting any potential issues early on.

App Loom video with my commentary:

<https://www.loom.com/share/d7bd1928fdd045f88b08aa2009ee51fc>

DYO Painting Service Health App (Lead Mobile Developer): DYO is a service app that connects users with local painters and renovators. Users can post service requests, and professionals can view and respond with quotations. Once a quotation is accepted, the app will match the user and professional. The app also has messaging features, galleries, and the ability to leave reviews and ratings. It is built with React Native.

App Loom video with my commentary:
